

ASHOK KUMAR KORI

Linux & IT Infrastructure Engineer | DevOps | AWS Cloud | IT Operations
ashok.ak78@gmail.com • +91 99811 73492 • Indore, MP • [linkedin.com/in/ashokk-kumar-kori39b4ab26](https://www.linkedin.com/in/ashokk-kumar-kori39b4ab26) • github.com/ashok2078

PROFESSIONAL SUMMARY

Results-driven IT Infrastructure Engineer with of hands-on experience managing enterprise Linux environments, network infrastructure, and IT operations. Proven track record of scaling IT operations from 50 to 220+ locations while maintaining 99.9%+ uptime. Strong foundation in RHEL/CentOS administration, AWS Cloud, and automation tools. Seeking a role in an IT-focused organization where I can contribute deep infrastructure expertise and grow in DevOps and cloud engineering.

PROFESSIONAL EXPERIENCE

IT Manager — Infrastructure & Operations

Sep 2014 – Aug 2025 (11 Years)

Ecom Express Limited — Indore, MP

Infrastructure & Operations Management

- Administered RHEL/CentOS 7/8/9 and Windows Server environments across 220+ locations, maintaining 99.9%+ uptime for mission-critical operations.
- Led 24x7 IT operations — incident response, change management, on-call escalation, and SLA governance across a distributed infrastructure.
- Scaled IT operations from ~50 to 220+ locations without any service degradation or SLA breach, demonstrating strong capacity planning and execution.
- Managed P1/P2 incident RCA lifecycle — root cause documentation, permanent fixes, and runbook maintenance to eliminate recurring failures.
- Implemented proactive monitoring using Nagios & Zabbix with custom dashboards; conducted daily log analysis (syslog, auth.log) for anomaly detection.
- Performed OS patching, kernel upgrades, user/permission management, and LVM/NFS administration across large server estates.

Linux Administration & Automation

- Deployed Ansible playbooks and roles for automated configuration management and server provisioning across RHEL/CentOS fleets.
- Managed Docker containerised workloads — built, deployed, and maintained containers for internal applications and microservices.
- Supported Jenkins CI/CD pipelines including Jenkinsfile-based pipeline-as-code, build automation, and Git-integrated deployment workflows.
- Applied CIS security hardening benchmarks — SELinux policy management, SSH key-based authentication, ACL, and firewall rules.
- Automated routine system administration tasks using Bash shell scripting — cron scheduling, log rotation, health checks.

AWS Cloud & Infrastructure

- Configured and managed AWS EC2 instances, Security Groups, EBS volumes, IAM roles/policies, and VPC networking.
- Migrated on-premise backup workflows to AWS S3, significantly reducing storage costs and improving recovery time objectives.
- Provisioned cloud infrastructure using Terraform (IaC) for repeatable and version-controlled AWS deployments.

Network Administrator

Jan 2009 – Aug 2014 (5.5 Years)

Swami Vivekananda Group of Colleges — Indore, MP

- Managed Windows Server infrastructure — Active Directory, DNS, DHCP, GPO, Domain Controller — supporting 500+ users across campus.
- Configured site-to-site VPN, Cisco routers and switches, VLAN segmentation, and Wi-Fi access points for LAN/WAN infrastructure.
- Delivered L2 helpdesk support, security hardening, and patch management, maintaining consistent network uptime across all systems.

KEY PROJECT (Self-Developed — Skill Enhancement)

Kubernetes Cluster Setup & CI/CD Pipeline

Tech Stack: Kubernetes (kubeadm) | Calico CNI | Jenkins | Docker | Ansible | AWS

- Deployed a production-grade Kubernetes cluster from scratch using kubeadm with Calico CNI for secure pod networking.
- Designed application deployments using Kubernetes Deployments, Services, ConfigMaps, and an Ingress controller for external traffic.
- Built an end-to-end CI/CD pipeline with Jenkins, Docker, and Kubernetes — reduced manual deployment steps significantly.
- Automated cluster provisioning using Ansible playbooks to ensure consistent environment state across all nodes.
- Diagnosed complex Kubernetes issues — Pod Pending states, node taint conflicts, CNI networking errors.

TECHNICAL SKILLS

Operating Systems	RHEL 7/8/9, CentOS, Windows Server 2012–2022
Cloud (AWS)	EC2, S3, VPC, IAM, Security Groups, EBS, CloudWatch
Automation / DevOps	Ansible (Playbooks/Roles), Docker, Jenkins CI/CD, Terraform, Git
Monitoring	Nagios, Zabbix, Prometheus, Grafana, Log Analysis (syslog, auth.log)
Linux Admin	LVM, NFS, SSH, Cron Jobs, Bash Scripting, SELinux, ACL
Windows / AD	Active Directory, DNS, DHCP, GPO, Domain Controller, RDS
Networking	VPN, Routing & Switching, VLANs, Cisco Routers/Switches
IT Operations	Incident Management, RCA, Change Management, Backup & Recovery
AI Tools	ChatGPT, Microsoft Copilot — AI-assisted automation & reporting

EDUCATION & CERTIFICATIONS

Bachelor of Arts (B.A.) 2010

DAVV, Indore, MP

Diploma — Hardware & Networking 2007

Jetking Infotrain, Mumbai

Training — RHEL Linux | AWS Cloud | DevOps Tools

Plowitech Academy, Mumbai

Advanced Windows Server 2022 & Routing.

LinkedIn Learning |

Advanced Excel Workshop

Ira Skills, Mumbai

ADDITIONAL INFORMATION

Availability: Immediate — Available to join within 7 days

Relocation: Open to relocation across India | Strongly prefer Remote/Hybrid roles
